May 2007 NEWSLETTER

Machinery

Interesting developments over the past 2 months. We have completed a Heavy Duty Brush Harvester. It is manufactured to go on all type of terrain and it has a new, improved design for easy and reliable operation.

It has been built with a Heavy Duty Frame, Centrifugal Clutch Motor and a Split Brush with a central bearing for smooth operation.

It can harvest from a low 100 mm to a high 1100 mm (1.1 metre) off the ground harvest points (bottom of the brush)

KIM

Brush harvester at near highest point.
