Rangeland Revegetation, Seed Production and Procurement Services

Kimseed was established in 1970 by Stephen Hill to service rural land development and to supply seed, equipment, technical expertise and project management throughout Australia, the Middle East and Asia Pacific Rim. Over the past 39 years, Kimseed has offered knowledge and advice to projects in construction, forestry, agriculture and mining as well as exporting equipment and consulting services to over 100 Countries.

Many Research and other Organisations throughout the world use Kimseed Planting, Harvesting and Processing Equipment. As a result of this, Kimseed has been able to learn from their experience, and offers uniquely designed equipment suitable for a variety of environmental and soil conditions, as well as diverse types of seeds.

Seed Threshing

In general, **Kimseed** can:

- 1) Produce the initial Environmental Assessment and Viability Study of any Project, large or small. We can identify the required species, develop and implement seed banks, produce Soil and environmental Data Studies to properly implement a project, and train the staff in charge to manage the early stages of a project. In the absence of local seeds, we can suggest and supply replacement varieties suitable to the Geographical and Environmental conditions of a project.
- 2) Supply the Equipment required for Native Seed Harvesting - Small or Large - ; Supply the Seed Processing and Seed Storage Equipment to handle seeds so that their viability and germination characteristics are fully protected.
- 3) Supply the Equipment to properly plant these seeds as per the client requirements, advising those in charge on how to prepare soils and seeds to achieve maximum germination results.

Camel Pitter

Environmental Study

- 4) Fully cover in our involvement with a project, all aspects of development, whether they are short - Medium or Long Term objectives. Ensure proper training and understanding by all concerned of the required steps and care needed to succeed.

Seed Management training

Seed Being Processed

Seed Processing Training

- 5) As a project evolves, procure the Equipment and Supplies that may be needed as this project grows, ensuring a successful outcome after a specified time frame.
- 6) The uniqueness of **Kimseed** is that it is surely the only company in the world capable of offering a “**One Stop Shop**”. (All needs supplied by one source). And also having 35 years experience in all aspects of Seed Production-Management-Project Development and Implementation.

We are proud of our achievements, and can assure any prospective user of our Services and or Equipment 100% satisfaction and results as expected.
