Newly Designed Aluminium Cone 300

The brand new design of the Kimseed Aluminium Cone offers substantial improvements over the older model. These improvements are:

- 1) Laser profiled mounting plate
- 2) Back-to-back self alignment bearings on main shaft
- 3) Self lubricating bearings on all rollers
- 4) Smooth and effortless turning using very little power
- 5) Full protection with new wind guard.

All of the above points result in a more precise seed dispensing onto the distributor .

ASSEMBLY

The only required assembly is the top Funnel Support spigot.

Screw back in place. Locktite could be used so that the spigot stays in place.
