# Kimseed Modular Hand Sieve

**NEW TO 2009**

Complete Unit

Locating Frame and Base pan

Base Pan

Following the principle of our Seed Cleaner Modular Screens, we now offer a Modular Screen System.

Using a rectangular frame, screens slide into position allowing a range of screen sizes that can be used with every frame, thus reducing cost and increasing versatility of the frame.

The frame is a once only expense and many screens can be added later to increase versatility of the Frame.

Used in conjunction with the KIMSEED Vacuum Separator provides a cost effective cleaning system for smaller amounts of seeds.

Use the hand sieve as a quick and easy method to size screens before using them in the KIMSEED Seed Cleaner.

Kimseed Modular Hand Sieve

- 1 -

Closer view of screen and screen tray.  
Notice how screens can be easily replaced

Various screen sizes can be used.

**The screens are compatible with the KIMSEED seed cleaner on the new magnetic frames so a screen only needs to be purchased once.**

**Screens available in various sizes in both slotted and hole formats depending on seed type.**

**Easy, versatile and inexpensive the modular sieve system is a perfect addition to any seed processing enterprise.**
