Handheld Brush Harvester

Manual brush harvester collecting grass seed

The new **Kimseed Handheld Brush Harvester** is the perfect tool for collecting small amounts of seed in otherwise inaccessible areas.

Collect local and native seed for regeneration and landscape restoration projects quickly and easily.

The manual seed collector allows you to access rugged terrain inaccessible to vehicle drawn mechanical harvesters.

Allows you to harvest the seed you need with little or no environmental impact.

Features and Benefits

- ◆ Harvest a wide variety of native and imported grass, shrub and small tree species.
- ◆ Collect seed quickly and easily. 10 times more efficient than collecting seed by hand.
- ◆ 50% to 80% of available seed collected in a single sweep.
- ◆ A range of brush types are available depending on use. Softer brushes collection of grass seed and fluffy species or steel chords for collection from harder seed pods.
- ◆ Speed reducer allows for ripened seed collection and leaves green seed for later.
- ◆ Nylon shoulder strap supports the weight of the unit and allows for an easy sweeping action when harvesting.
- ◆ Packs away in 2 pieces for convenient storage and easier transport
- ◆ Optional Body Strap Harness available to reduce operator fatigue
