

Kimseed Multi Seeder

The **Kimseed Multi Seeder** is Ideal for establishing rangeland **pastures simply and cheaply**. This seeder maintains **constant agitation** of seeds of all densities, as well as fertilizers, mulch and manure, to ensure **accurate and even distribution**. It will also sow crop seeds. It is especially designed for fluffy and winged and oddly shaped seeds which will not flow through normal seeders, for example buffel and saltbush seed.

Features:

- Power requirement 7-15 hp
- Handles seeds of all densities including light fluffy seeds and varying density seed mixes.
- Internal agitator maintains seed flow.
- Handles small sticks in uncleaned seed
- Sowing rates easily adjustable.
- Simple to maintain and operate.
- Sowing widths: 2 , 3, & 4 metres.
- Seed drum capacity
 - 2m = 250 litres
 - 3m = 375 litres
 - 4m = 500 litres
- **Optional spring harrows** for covering seeds if required.
- Operating speed 5-7 kmh
