Kimseed Small Aspirator

The Kimseed Small Aspirator is the cheapest and efficient option to clean small amounts of many seeds, in particular Canola.

This machine was developed by Kimseed to compensate a need for one of our research institutions client.

YouTube Video: <https://youtu.be/n--lmr2G8Yg>

Power: 230V AC 50Hz 5 Amp

Features:

- Quick and easy separation of lighter impurities from seeds.
- Quick cleaning of research quantities of seeds.
- Portable
- Adjustment of both: fan speed and vacuum flow using speed control knob or sliding suction port.
- Separation can be further enhanced by using different sized Kimseed sieves.

The Small Aspirator basic working :

Seeds heavier than the trash are collected in the chute outlet and the lighter trash is lifted up into the pail and trash bags.
